EDUCATION

University of Bahrain

BSc in Computer Science, GPA: 3.83

Expected Graduation: Late 2026

Relevant course work:

Data Structures & Algorithms, Object-Oriented Programming, Databases, Software Engineering

PROFESSIONAL SUMMARY

Computer Science student at the University of Bahrain with a strong foundation in Java, Python, and JavaScript. Currently developing skills in full-stack development (Node.js) and mobile application development (Flutter). Passionate about building practical software solutions and continuously learning new technologies. Seeking a Summer 2026 internship to gain hands-on industry experience before graduation.

PROJECTS

Course Review Platform PHP, JavaScript	2025
- Developed a dynamic web application for reviewing university courses - Designed and integrated a database for storing and managing user feedback - Implemented core features such as course listings and user interaction	
Machine Learning Project Python	2025
- Implemented basic machine learning models to analyze Parkinson's disease data - Applied data preprocessing and model evaluation techniques - Strengthened understanding of data analysis and predictive modeling	
Artisan Cooperative Platform React, Node.js (In Progress)	2026
- Collaborating on a full-stack platform to support a local artisan community - Contributing to frontend development using React and backend logic using Node.js - Helping digitize product listings and sales processes	
Sprout – Local Marketplace App Flutter, Dart (In Progress)	2026
- Building a cross-platform mobile marketplace for local buying and selling - Designing user interface and application structure using Flutter - Focused on usability and efficient user-to-user transactions	

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, Dart, C++ (Basic)

Computer software/ frameworks: Node.js (Familiar), Flutter (Familiar), Git, GitHub

Core Concepts: Data Structures, Algorithms, Object-Oriented Programming (OOP)
